PREFACE.

THE WORLD'S READY RECKONER AND RAPID CALCULATOR consists of a number of tables, by which the value of any number of pounds, gallons, yards, feet, etc., of any article, from one to a thousand, at from one quarter of a cent to ten dollars each, can be told at a glance.

No mathematical calculation is necessary, as the tables are so arranged that any person, by looking at the head of the page to find the given price, and at the column at the side for the number wanted, can tell the value of the article at once.

Suppose you wish to find the value of 26 pounds of sugar at 7½ cents a pound; find the 7½ cents page, run down the No. column until 26 is found, and opposite you will read $1.95, the value of the sugar.

These tables are accurate and without error.

The book contains besides these tables, the value of foreign money reduced to equivalent value in dollars and cents, table of board measure, tables of wages by hour, day, week and month, business forms and other matter valuable to the home, office or factory.

Half Dime	05
Three Cents	03
5 Cents, Nickle	05
2 " Copper	02
1 " "	01
Penny "	01

The *paper* currency of the United States consists of national bank notes, gold and silver certificates and treasury notes—ranging from $1.00 to $10,000 in value, and are worth their face value in gold and silver, redeemable in either coin, and are legal tender. Fractional currency notes are no longer issued.

ENGLAND.

GOLD.

Five Sovereigns	$26 00
One Sovereign	4 84
Half Sovereign	2 42
Double Guinea	11 00
One Guinea	5 25–6 00
Half Guinea	2 56
Third Guinea	1 70

SILVER.

100 Francs	19 15
500 Francs	95 00
1,000 Francs	191 15

The *franc*, or 100 *centimes*, is the standard of currency, and trade exchange is computed in this coin. France belongs to the Monetary League with Belgium, Italy, Greece and Switzerland, which have adopted the decimal system of currency.

BELGIUM.

Gold, silver, and currency the same as France.

Belgium is one of the five continental states (France, Italy, Greece, Switzerland and Belgium) which have formed a monetary league, agreeing upon the decimal system, thus forming a perfect reciprocity in the currency of the five countries.

GERMANY.

GOLD.

Twenty Marks	$4 73
Ten Marks	2 36
Five Marks	1 18
Ten Thalers	7 80
Five Thalers	3 90

Double Guilder (called)	60

BANK NOTES.

5 Marks	$1 16
20 Marks	4 70
50 Marks	11 75
100 Marks	23 50
500 Marks	117 50
1,000 Marks	235 00

The *mark* of 100 *pfennig* is the standard of trade exchange. The 5 mark gold piece is called the *halbe-krone* (half-crown), the 10 mark gold piece is called the *krone* (crown), and the 20 mark gold piece is called the *doppel-krone* (double-crown). Small paper notes for 5, 20 and 50 marks are called *reichskassenscheine.*

AUSTRIA.

GOLD.

Quadruple Ducat	$8.80
One Ducat	2 20
Sovereign	6 75
Half Sovereign	3 38
4 Florins (10 Francs)	1 93

SILVER.

Specie Dollar	$0 75
One Florin	36

BANK NOTES.

1 Guilder	$0 40
5 Guilder	2 00
10 Guilder	4 00
50 Guilder	19 50
100 Guilder	39 00
1,000 Guilder	390 00

Copper coins are the 4, 1, and ½ *kreuzer*. A 4 kreuzer piece is worth 1 $\frac{6}{10}$ cents, 1 *kreuzer* is worth $\frac{4}{10}$ cents. State notes are issued for 1, 5, and 50 florins, bank notes for 10, 100 and 1,000 florins. The legal standard of the country is silver, and the *florin*, divided into 100 *kreuzer*, the unit of money. The chief medium of trade, however, is the paper currency.

SWITZERLAND.

Gold same as France.

SILVER.

Five Francs	$0 93
Two Francs	36
One Franc	18

Switzerland belongs to the Monetary League formed by the union of France, Belgium, Greece, Italy and Switzerland. See FRANCE.

HOLLAND.

The unit of account is the gold *yen*. The medium of internal trade is paper currency of the various denominations and is on a par with silver.

The copper coins consist of $\frac{1}{10}$ (or *rin*) sen piece, ½ sen, 1 sen and 2 sens.

Practical Mensuration.

Embracing many new and original ideas and short methods. Arranged for easy business reference, special classes in schools, and all who wish to become skilled in this important branch of mathematics.

Explanation of Signs.

+ Plus, the sign of addition.
— Minus, the sign of subtraction.
× Multiplied by, the sign of multiplication.
÷ Divided by, the sign of division.
= Equals, the sign of equality.

Cylindrical Capacity.

To find the cylindrical contents of a cylinder.

RULE.—Square the diameter and multiply by the depth.

To find the cylindrical contents of a frustum of a cone.

RULE.—To the product of the upper and lower diameters add the sum of their squares, and multiply by one-third of the depth.

To change cubic to cylindrical measure.

RULE.—Divide the cylindrical contents by .7854.

To change cylindrical to cubic measure.

RULE.—Multiply the cylindrical contents by .7854.

NOTE.—A cylindrical foot is the volume of a cylinder one foot in depth and diameter, and contains 1728 cylindrical inches. It is equal to .7854, or for greater accuracy .785398 plus part of a cubic foot. A cylindrical foot contains 1357.16 plus cubic inches, and a cubic foot contains 2200.15 plus cylindrical inches.

Cubic Capacity.

To find the cubic contents of a cylinder.

RULE.—Find the cylindrical contents by the preceding rule, and multiply by .7854; or, square the diameter in inches, multiply by the depth in feet and by .005454+.

To find the cubic contents of a frustum of a cone.

RULE.—Find the cylindrical contents by the preceding rule, and multiply by .7854.

To find the cubic contents of a cone or a pyramid, whether round, square, or triangular.

RULE.—Multiply the area of the base by one-third of the altitude.

Measurement of Area.

To find the diameter of a circle.

RULE.—Multiply circumference by .31831; or, extract square root of area and multiply by 1.12838.

To find the circumference of a circle.

RULE.—Multiply the diameter by $3\frac{1}{7}$ or 3.1416; or, multiply radius by 6.283185.

To find radius of a circle.

RULE.—Multiply circumference by .159155, or square root of area multiplied by .56419.

To find the side of an inscribed square of a circle.

RULE.—Multiply diameter by .7071. Multiply circumference by .225.

To find the side of an equal square of a circle.

RULE.—Multiply circumference by .282; or, multiply diameter .8862.

To find the side of an inscribed equilateral triangle.

RULE.—Multiply diameter by .86.

To find the area of a circle.

RULE.—Multiply the square of the radius by 3.1416; or, multiply the square of the diameter by .7854; or, square the circumference and multiply by .07958; or, multiply one-half the circumference by half the diameter.

To find the area of an ellipse.

RULE.—Multiply both diameters together and by .7854.

To find the area of an inscribed square of a circle.

RULE.—Multiply the diameter by one-half itself.

To find the area of a triangle.

RULE.—Multiply base by one-half the altitude.

To find the area of a trapezoid.

RULE.—Multiply the altitude by one-half the sum of its parallel sides.

Cistern, Tank, and Barrel Measure.

Find the cylindrical feet, and for

Gallons,	× 5.875 or 5⅞	Wine measure.
Barrels	× .1865	
Hogsheads	× .09325	
Gallons	× 4.8126	Beer measure.

Or, find the cubic feet, and for

Gallons,	× 7.48	Wine measure.
Barrels	× .2374	
Hogsheads	× .1187	
Gallons.	× 6.1276	Beer measure.

EXAMPLES.

How many barrels wine measure are contained in a cylindrical cistern, the diameter 4 feet and the depth 6 feet.

Operation.—Find the cylindrical feet by squaring the diameter and multipling by the

depth, which equals, $4 \times 4 = 16$, $16 \times 6 = 96$. Now multiply 96 by .1865 (the part of a barrel in one cylindrical foot) and we have 17.9 + barrels.

How many gallons wine measure are contained in a railroad tank in the form of a frustum of a cone, the dimensions being as follows: Height, 15 feet; lower diameter, 22 feet; upper diameter, 20 feet?

Operation and solution.—

400	= square of upper diameter.
484	= " " lower diameter.
440	= product of upper and lower diameters.
1324	
5	$= \frac{1}{3}$ of the depth.
6620	= cylindrical feet.
$5\frac{7}{8}$	= capacity of one cylindrical foot.
38892.5	= gallons.

To convert Imperial gallons into United States wine galtons, multiply the Imperial by 1.2. To convert United States gallons into Imperial gallons, multiply the United Siates gallons by .883.

Sixty United States gallons equals sixty-one Imperial gallons, therefore, to convert one into the other, add or deduct 1-60th.

The United States standard gallon measures 231 cubic inches, and contains $8\frac{1}{3}$ lbs. of distilled water.

There are 27.68 cubic inches of water per lb. at 32° F. .036 lbs. cubic inches of water at 60°. 62.35 lbs. per cubic foot water at 62° F.

Forty-nine cubic feet soft coal per ton.

Forty to forty-three cubic feet hard coal per ton

The following list gives the value of rare and valuable United States coins. By using this as a reference, and carefully examining coins which come in your possession, you may be able to realize a handsome profit. The value of the coin depends upon its appearance. If worn and mutilated, even though a rare coin, the value will be very much less than if the coin was clean, bright and with sharp edges.

1852.	Proof.....	8.00

Some gold coins are very valuable; a double eagle, date 1849, having the head to the left is valued at $800.00. The gold half eagle of 1798, with a small eagle on it, is valued at $250.00. The same denomination, date 1815, is worth $300.00, and date 1822, $500.00. Of course none of these coins are in circulation, but the few that exist are held by collectors. A good collection of coins is more than that, it is a good investment, for every year adds value to a rare coin. Some other coins are valued as follows: Gold colonial coin of 1787, with sun-eagle, $300.00; of 1785, with justice eye, $500.00. A New England threepence of 1652 is worth $300.00.

Receipt on Account.

New York, April 27th, 1856. Received from *Zachary Taylor,* Seventy-five dollars on account.

LUKE F. COZANS.

Receipt in Full.

New York, May 11th, 1854. Received from *Messrs. Sutherland & Abbott,* One hundred and four $\frac{73}{100}$ dollars, in full of account to date.

$104 $\frac{73}{100}$.

WILLIAM J. BUNCE.

A receipt like the first acknowledges the partial payment of a debt, and one like the second, of all claims excepting negotiable notes.

Notes on Demand.

(1) $300. *New York, February 14th*, 1847.

On demand I promise to pay *Samuel Huestis*, or order, three hundred dollars, value received. JAMES SMITH.

(2) $205 50. *Brooklyn, July 4th*, 1846.

For value received I promise to pay *Charles Greene*, or bearer, two hundred and five dollars and fifty cents, on demand with interest. CHARLES P. HUESTIS.

Note on Time.

(3) $275. *Jersey City, April 27th*, 1842.

Ninety days after date I promise to pay *Messrs. Holland & Glover*, or order, two hundred and seventy-five dollars, value received. VINCENT L. DILL.

A Joint Note.

(4) $305 75. *New York, June 5th*, 1845.

Six months after date we severally and jointly promise to pay *George Snyder*, or order, three hundred and fifty dollars and seventy-five cents, value received. JAMES BRUCE,
PHILIP COZENS.

Bank Note.

(5) $800. *Newburgh, July* 10, 1841.

Sixty days from date I promise to pay *S. G. & B. Jones*, or order, at the Chemical Bank, eight hundred dollars, valued received. N. C. GOLDSMITH.

Remarks.—The above are the usual form of notes. A note on demand, as No. 1, is due at any time when demanded. A note payable to S. H. or *order*, may be sold or negotiated if S. H. writes his name upon the back, and if payable to S. H. or *bearer*, it can be sold without being endorsed, and will be good to the holder. In the State of Pennsylvania the words "*without defalcation*" are inserted after dollars.

When two or more persons sign a note "severally and jointly," they are eacn responsible for its payment. The words "*value received*" should be written on a note to make it valid.

A person endorsing a note, or writing his name across the back, becomes responsible for its payment. If, however, the person thus endorsing is not notified when the note becomes due, of its non-payment by the drawer, he can no longer be held responsible for its payment. A partial payment of a note should always be endorsed on the same.

Due Bill.

$25. *Hudson, February* 4, 1842.

Due *John Smith* twenty-five dollars, on demand, value received.

JOHN JONES.

Order for Money.

$75. *New York, June 4th*, 1843.

Mr. George W. Strong,

Please pay *Daniel Fanshaw*, or order, seventy-five dollars, and place the same to the debt of ROBERT H. ELTON.

Remarks.—Orders may be written payable to B. C. or order, or to B. C. or bearer. If written in the former manner, B. C. can dispose of it, provided he writes his name upon the back. If payable to B. C. or bearer, it will be good to the holder.

Inland Drafts.

A draft is much the same as an order. An order is generally given upon individuals in the vicinity of the parties concerned, while a draft is an order upon individuals more distant.

Newburgh, October 10, 1846.

$500.

Thirty days from date pay *Charles P. Huestis*, or order, five hundred dollars, and charge the same to

THOMAS HOYT.

Mr. John Slater, New York.

New York, November 5, 1842.

$300.

At sight pay *John Dexter*, or order, three hundred dollars, and place the same to the debt of

ROBERT GRAHAM.

Messrs. Burgess, Stringer & Co., New York.

Form of a Common Bill.

Mr. George Wright, To STEPHEN DRIVER *Dr.*

March 12th, 1842, To 20 Bushels of Apples, at 25 cts. = $5 00

Rec'd. Pay't. GEORGE WRIGHT.

Agreement.

This Indenture, made the day of in the year one thousand eight hundred and
Between

WITNESSETH, that the said in consideration of the covenant and agreement hereinafter mentioned, doth by these presents put and bind to the best of power and skill, faithfully and honestly, during the term of from the date hereof, in all lawful business and matters that the said may direct

and the said doth hereby covenant and agree with the said to during the said term,

IN WITNESS WHEREOF, the said parties to these presents have hereunto set their hands and seals, the day and year first above written

Sealed and delivered in the presence of

Contract for Building, made the day of one thousand eight hundred and by and between of the second part, in these words: the said *part* of the second part *covenant* and *agree* to and with the said party of the first part, to make, erect, build, and finish, in a good, substantial, and workmanlike manner, on the

agreeable to the draft, plan, and explanation hereto annexed, of good and substantial materials, by the day of next. And the party of the first part covenants and agrees to pay unto the said *part* of the second part, for the same the sum of lawful money of the United States, as follows: the sum of

and for the true and faithful performance of all and every of the covenants and agreements above mentioned the parties to these presents bind themselves each unto the other in the penal sum of dollars, as fixed and settled damages to be paid by the failing party.

In Witness whereof, the parties to these presents have hereunto set their hands and seals, the day and year first above written.

Sealed and delivered in the presence of

A receipt like the first acknowledges the partial payment of a debt, and one like the second, of all claims excepting negotiable notes.

INLAND DRAFTS.

A draft is much the same as an order. An order is generally given upon individuals in the vicinity of the parties concerned, while a draft is an order upon individuals more distant.

Rec'd Pay't. GEORGE WRIGHT.

AGREEMENTS BETWEEN LANDLORD AND TENANT.

Tenant's Agreement.

This is to Certify, That I have **Hired** and **Taken** from J. W. PARROTT, of the Village of New Paltz, New York, a House and Lot, known as number 27, Dolittle Street, in the Village of New Paltz, aforesaid

for the term of one year, from the 1st day of May, 1854, at the yearly rent of two hundred and fifty dollars, payable quarter yearly.

And I hereby promise to make punctual payment of the rent in manner aforesaid, and quit and surrender the premises, at the expiration of said term, in as good state and condition, as reasonable use and wear thereof will permit, damages by the elements excepted, and engage not to let or underlet the whole or any part of the said premises, without the written consent of the Landlord, under the penalty of forfeiture and damages; and also not to occupy the said premises for any business deemed extra-hazardous without the like consent, under the like penalty.

GIVEN under my hand and seal the 10th day of June, 1854.

P. J. COZANS.

AGREEMENTS BETWEEN LANDLORD AND TENANT.

Surety.

In Consideration of the Letting of the premises above described, and for the sum of one dollar, I hereby become Surety for the punctual payment of the rent, and performance of the covenants in the above written agreement mentioned, to be paid and performed by P. J. Cozans, and if any default shall be made therein, I hereby promise and agree to pay unto J. W. Parrott, such sum or sums of money as will be sufficient to make up such deficiency and fully satisfy the conditions of the said agreement, without requiring any notice of non-payment, or proof of demand being made

GIVEN under my hand and seal the 10*th day of June*, 1854.

E. D. Abbott.

AGREEMENTS BETWEEN LANDLORD AND TENANT.

Landlord's Agreement.

This is to Certify, That I have **Let** and **Rented** unto P. J. Cozans, the House and Lot, known as number 27, Dolittle Street, in the Village of New Paltz, New York; for the term of one year, from the 1st day of May, 1854, at the yearly rent of two hundred and fifty dollars, payable quarter yearly.

The premises are not to be used or occupied for any business deemed extra-hazardous on account of fire, nor shall the same, or any part thereof, be let or underlet without the written consent of the Landlord, under the penalty of forfeiture and damages

GIVEN under my hand and seal the 10*th day of June*, 1854.

J. W Parrott.

Form of Letter of Credit.

NEW YORK, JULY 10th, 1854.

MESSRS. GEORGE LITTLE & Co., *Gentlemen*.

Please deliver to James Ennings of this place, Merchandise to any amount not exceeding ten thousand dollars, and I will hold myself accountable to you for the payment of the same, in case Mr. Ennings should fail to make payment thereof.

You will please to notify me of the amount for which you may give him credit, and if default should be made in the payment, let me know it immediately.

I am gentlemen, your most obedient servant,

E. LYON.

MESSRS. GEORGE LITTLE & Co.,
No. — Market Street, Philadelphia.

Form of a Bill of Exchange.

Exchange for

$300 $\frac{00}{100}$.

New York, May 19th, 1854.

Ten days after sight of this *First* of Exchange, (Second and Third unpaid,) pay to the order of *Joseph McHenry* Three Hundred Dollars

Value Received, and charge the same to account

E. D. ABBOTT.

To Luke F. Cozans,
Baltimore, Md.

Form of Judgment Note.

$900 00

For value received I promise to pay to *Henry Richards*, or order, the sum of Nine hundred dollars, ninety days after date, and I hereby nominate, constitute, and appoint the said *Henry Richards*, or any Attorney-at-law of this State, my true and lawful Attorney irrevocable, for me, and in my name, to appear in any Court of Record of this State, at any time after the above Promissory Note becomes due, and to waive all process and service thereof, and to confess judgment in favor of the holder hereof for

the sum that may be due and owing hereon, with interest and costs and waiving all errors, &c.

In Witness whereof, I have hereunto set my hand and seal at the City of Cincinnati, State of Ohio, this 10th day of May, one thousand eight hundred and fifty-four.

E. D. ABBOTT. SEAL.

Sealed and delivered in the presence of

E. LYON,

JOHN SUTHERLAND.

The principal difference between a Sealed Note, and one without a Seal, is, that the former must be first paid in the settlement of a decedent's estate, and is not barred by the Statute of Limitation.

FORM OF MARRIAGE.

The parties having joined hands say: "By this act of joining hands, you do now assume toward each other the relations of husband and wife, and do solemnly promise as such, to love, honor, and cherish each other so long as you both shall live. I therefore pronounce you to be henceforth husband and wife."

NOTE NOT NEGOTIABLE.

New York, December 9th, 1887.

$700 00.

Ten days after date I promise to pay to Matthew Smith, Seven hundred dollars, value received.

JAMES OTHELO BRICKS.

NOTE NEGOTIABLE BY ENDORSEMENT.

Brooklyn, L. I., June 7th, 1887.

$310 00.

Twenty days after date, I promise to pay to the order of JOHN DEE, Three hundred and ten dollars, value received.

RICHARD THIRD.

NOTE NEGOTIABLE WITHOUT ENDORSEMENT.

$1,000.

New Orleans, September 9th, 1887.

Two months after date, I promise to pay to

Joseph Suds or bearer, One thousand dollars, value received.

MARTIN T. SMITH.

Joint Negotiable Note Payable at a Bank.

$1,100.

New York, December 20th, 1887.

Four months after date we promise to pay Henry Jones or order, Eleven hundred dollars, at the Mechanics Bank, New York.

MESSRS. DOE, ROE & CO.

Negotiable Note payable in Merchandise

$300 00.

Boston, October 11*th*, 1887.

Thirty days after date for value received, I promise to pay to EDWARD SOMERS, or order, Three hundred dollars in merchantable corn, at the current price.

ALEXANDER GLENDENING.

The Author of the Mechanics' and Laborers' Ready Reckoner, believes he has made a book that will be useful and convenient. Employers will find it convenient in ascertaining the amount due to their workmen for any given time, from a quarter of a day to six days; at wages from twenty-five cents to two dollars and fifty cents a day.

Calculations are also made for labor by the hour, for nine, ten, eleven and twelve hours a day; from twenty-five cents to two dollars and fifty cents.

Farmers and others employing men by the month, will find their wages given for any number of months and days; from two dollars a month to fifty.

Also, wages by the year; from five dollars to five hundred, are so calculated that the amount for any fractional part of the year can readily be ascertained.

Proprietors of hotels and boarding houses will find it very convenient in ascertaining the amount of board due for any number of days, from one to seven; at board from one dollar to seven. And also, for wages due their servants.

Those employed will also find it useful in finding, at a glance, the amount due them for labor, for any length of time, from one quarter of a day to one year. To those it is invaluable: for by referring to the proper table, they can find the amount due them, without reference to figures.

To which is added, the usual forms of notes, receipts, bills, and articles of agreement.

INTEREST.

The method of reckoning interest generally used by the best accountants and book-keepers is what is known as the sixty-day method. By this method 360 days are reckoned as a year and 30 days as a month. Six p. c. for 12 months, or 1 year, is equivalent to 1 p. c. for 2 months, or 60 days, and 1 p. c. of any number is easily found by moving the decimal point two places to the left. Therefore, the interest on any amount at 6 p. c. per annum for 2 months, or 60 days, may be found by moving the decimal point two places to the left. Having found the interest for 60 days, in order to find it from that amount for any number of days, simply divide them into aliquot parts of 60.

EXAMPLE 1: Interest on $128 for 90 days.

1.28 = interest for 60 days.
.64 = interest for 30 days.

1.92 = interest for 90 days. 60 + 30.

EXAMPLE 2: Interest on $185.40 for 47 days.

1.8540 = interest for 60 days.

.9270 = interest for 30 days, ½ of 60.
.4635 = interest for 15 days, ½ of 30.
.0618 = interest for 2 days, ⅓ of 6.

1.4523 = interest for 47 days. 30+15+2.

To calculate the interest on any sum from $1 to $12,000. Having found the interest at 6 p. c., as shown on page 161, to find it for—

1	p.c.	divide by	6.	5	p.c. subtract ⅙.
1½	"	"	4.	7	" add ⅙.
2	"	"	3.	7½	" " ¼.
3	"	"	2.	8	" " ⅓.
4	"	subtract	⅓.	9	" " ½.
4½	"	"	¼.		

Lightning Table for Marking Goods Bought by the Dozen.

Retailers buy most of their articles by the *dozen*, such as boots, shoes, hats, caps, and notions of various kinds. A vast amount of time is employed in marking goods by the old process, and errors are frequent, owing to the unnecessary figures used. If the purchaser will commit to memory the following table, he can instantly find the retail price of a single article with any desired business per cent. added. The following per cents. are those generally used in business:

To make			Divide the cost per doz. by			
20	per	cent.	10			
33⅓	"	"	9			
50	"	"	8			
100	"	"	6			
40	"	"	10,	and add	1-6	itself.
35	"	"	10	"	1-8	"
37½	"	"	10	"	1-7	"
30	"	"	10	"	1-12	"
25	"	"	10	"	1-24	"
12½	"	"	10,	and subtract	1-16	"
16⅔	"	"	10	"	1-36	"
18¾	"	"	10	"	1-96	"

R. H. Jones purchased one dozen hats for $27.00, and marked them to sell at a profit of 33⅓ per cent. What was the retail price of a single hat?

Explanation. — According to table, simply divide the cost per dozen by 9.

9) $27.00

Ans. $3.00

For how much must I sell books, bought at $28.00 per dozen, to gain 25 per cent.

Explanation. — Removing the point one place to the left, on $28.00 we get $2.800. Now add ¼ itself and we have $2.91+ ans.

24) 2.800
.11
$2.91+

The above table should be committed to memory.

Board Measurement.

Boards are bought and sold by the square foot of surface, one inch thick. If thinner than one inch, they are counted the same as if one inch thick. To find the number of square feet in a board, multiply the width *in inches* by the length *in feet* and divide the product by 12. This will give the number of feet in the board, and the remainder, if any, will be the odd inches. If the remainder be six inches or more, they will be counted as an additional foot.

EXAMPLE.—Find the number of square feet in a board 20 inches wide by 16 feet long.

PROCESS.—Multiply 20 (the width in inches) by 16 (the length in feet).

$$16 \times 20 = 320.$$

Divide the product by 12.

$$12)320$$

$$26 - 8$$

Therefore there will be 27 feet in the board.

Plank Measurement.

Plank measurement is based on board measurement, rules and tables for which will be found on another page of this book. In order to find the contents of any plank, first find the contents of the *surface* on the basis of *one inch thickness*, then multiply the product so given *by the thickness of the plank in inches.*

EXAMPLE.—Find the contents of a plank 12 feet long, 12 inches wide, and 2½ inches thick.

PROCESS.—According to the rule for finding the square feet in a board (which will be found on a previous page), multiply the width in inches (12) by the length in feet (12). This gives 144. Divide the product so found by 12, which gives 12. This gives the contents of a board 1 inch thick, 12 feet long, and 12 inches wide. Multiply this product so found by 2½, the thickness of the plank in inches. The result will be 30, which is the contents in feet.

Timber or Scantling Measurement.

Timber or scantling for building purposes is bought and sold by the *square foot of inch-board measurement.* To find the number of square feet contained in a piece of timber or scantling of any given length, width and thickness, multiply the width in inches by the thickness in inches. Multiply the product so found by the length in feet, and divide by 12. This gives the number of feet, and if there be any remainder, this remainder will be the odd inches. If the remainder be over 6 inches, it is counted as one foot.

EXAMPLE.—*Find the number of square feet in a piece of timber 10 inches wide, 8 inches thick and 24 feet long.*

PROCESS.—Multiply the width in inches (10) by the thickness in inches (8). This gives 80. Multiply the product so found (80) by the length in feet (24). This gives 1920. Divide this by 12, which gives 160, which is the number of square feet desired.

30	247.6	250.	275.	300.	302.6	330.

Rule for Wood Measurement.

Wood is bought and sold by the cord. The length of a cord is 8 feet, the height 4 feet, and the width anything that may be agreed upon by buyer and seller.

It is an error to suppose that a cord of wood should always contain 128 cubic feet, as, for instance, cooking-stove wood is seldom over 20 inches in length, and when corded the width of the pile is far from being 4 feet.

RULE.—Multiply the length of the pile *in feet* by the height *in feet*, and divide by 32.

How many cords of wood in a pile 17 feet long, 6 feet high, and 4½ feet wide?

PROCESS.— 17=length.
6=height.

32)102(3 3-16 cords. *Ans.*
96

6

Log Measure.

To find the number of feet, *board measure*, contained in any log.

RULE.—From the diameter of the log at the small end in *inches*, subtract 4. Square one-fourth of the remainder and multiply by the length in feet.

To find the number of cubic feet in a round log in the shape of a frustum of a cone.

RULE.—Square both diameters in *inches*, and to their sum add the product of the diameters. Multiply by the length in feet and by .001818.

To find the number of cubic feet in the largest square piece of timber that can be sawn from a round log.

RULE.— Multiply the diameter of the small end in inches by one-half itself, and by the length in feet. Divide the result by 144, or multiply the diameter in feet by one-half itself, and by the length.

EXAMPLES.— How many feet of *inch boards* can be sawn from a log the diameter at the small end being 28 inches, and the length 11 feet?

PROCESS.—28 = diameter in inches.

4

4)24

Ans. $6^2 = 36$. $46 \times 11 = 396$.

How many cubic feet are contained in a round log 30 feet in length, diameter of small end 10 inches, and large end 20 inches?

PROCESS.—100=square of diameter, small end.
400=square of diameter, large end.
200=product of small and large diameters.

700
30=length in feet.

Ans. 21000X.001818 = 38.178 feet.

How many cubic feet are contained in the square of a round log 18 feet long, and diameter of the small end 4 feet?

PROCESS.—4÷2=2= (½ of diameter) 4 (diameter) multiplied by 2=8. 8×18 (length)=144 cubic feet.

Rule for Lumber Measurement.

Lumber is bought and sold by the foot, *board measure*, which is a square foot one inch in thickness. The standard lengths of planks, joists, scantlings, etc., are all

the even numbers ranging from 8 to 30 feet. The following will be found to be the shortest cuts possible to produce correct answers:

Inch thick.	Feet long.			
1	8	multiply width in *inches* by		2-3
1	10	"	"	5-6
1	12	"	"	1
1	14	"	"	1 1-6
1	16	"	"	1 1-3
1	18	"	"	1 1-2
1	20	"	"	1 2-3
1	22	"	"	1 5-6
1	24	"	"	2
1	26	"	"	2 1-6
1	28	"	"	2 1-3
1	30	"	"	2 1-2

GENERAL RULE.—Multiply the length in feet by the width and thickness in inches and divide by 12.

Rule for Stone Measurement.

Stone when laid in walls, fences, foundations, etc., is usually estimated by the perch, which contains 24¾ cubic feet. This mixed number is a very difficult divisor, and numerous attempts have been made to save reducing it to an improper fraction or decimal. The following simple rule is the shortest known:

RULE.—Find the cubic feet and multiply by .0404.

A wall 100 feet long, 5 feet high, and 2 feet thick, contains how many perches?

PROCESS.—.0404 = part of perch in one cubic foot.
1000 = cubic feet.

40.4000 = perches.

The above is an approximation although sufficiently exact for business purposes. If greater accuracy is required, add $\frac{1}{100}$ of the answer thus obtained.

Mechanics' Iron Rule.

To find the weight of wrought iron by measurement.

RULE.—Multiply the thickness and width in *inches* by one-third of ten times the length in feet.

For—Cast Iron,	deduct	1-16
Steel,	add	1-48
Copper,	"	1-7
Cast Brass,	"	1-13
Lead,	"	1-2

EXAMPLE. — How many pounds of wrought iron are contained in a bar 15 feet long, 1½ inches thick, and 2 inches wide?

PROCESS.—1½×2=3. Ten times the length equals 150. 150÷3=50, 50×3=150 pounds.

To Measure Corn in the Ear.

The number of bushels of shelled corn in any space filled with corn on the cob can be only approximately determined, owing to various conditions affecting the kernel and cob. The following simple rules are, however, recognized by custom in nearly all sections of our country.

RULE.—To find the number of bushels multiply cubic feet by 9 and divide by 20, or multiply cubic feet by .45, or divide cubic inches by 3840.

To find the number of Tennessee barrels (5 bushels each).

RULE.—Multiply cubic feet by .09.

EXAMPLES.—A crib 10 feet long, 8 feet high and 5 feet wide is filled with corn on the cob. How many bushels of shelled-corn does it contain?

45 =capacity of one cubic foot corn measure.
400=cubic feet.

180.00 bushels. *Ans.*

Rule for Brick Measurement.

Bricks are of different sizes, varying according to custom of State or locality. They are estimated by the *thousand*. When laid in walls one-eighth is allowed for mortar. A wall one layer in thickness is called a 4½-inch wall; two layers, a 9-inch wall; three layers, a 13-inch wall; four layers, an 18-inch wall; and five layers, a 22-inch wall. In most localities no deduction is made for openings, such as windows, doors, etc., as the extra work required is considered fully equal to plain work.

GENERAL RULE.—Multiply the number of square feet in the wall or house by the number of layers in thickness, and multiply the product by the number of bricks shown in a square foot when laid in walls.

The simple table on page 304 gives the names of six standard bricks, together with their dimensions and the number of each contained in a surface, or square foot, of a 4½-inch, 9-inch, 13-inch, 18-inch, and 22-inch wall.

EXAMPLE.—How many Baltimore bricks are contained in an 18-inch wall 56 feet long and 25 feet high?

PROCESS.— $56 \times 25 = 1{,}400$ square feet. Refer to Baltimore in the table, and directly opposite, in the 18-inch wall column, we find 26, the number of bricks per square foot, which, multiplied by 1,400, equals 36,400.

Name.	Size.	No. of bricks per surface foot 4½-inch wall.	No. of bricks per surface foot 9-inch wall.	No. of bricks per surface foot 13-inch wall.	No. of bricks per surface foot 18-inch wall.	No. of bricks per surface foot 22-inch wall.
Baltimore.....	8¼ × 4⅛ × 2⅜	6½	13	19½	26	32½
New York.....	8 × 3½ × 2¼	7⅑	14⅔	21⅓	28⅔	35⅑
Maine.....	7½ × 3⅜ × 2⅜	7.2	14.4	21.6	28.8	36
Michigan.....	8½ × 4⅛ × 2⅜	6⅓	12⅔	19	25⅓	31⅔
Fire.....	9⅛ × 4⅝ × 2⅜	6⅔	13⅓	20	26⅔	33⅓
Common.....	8 × 4 × 2	8	16	24	32	40

To Find the Number of Gallons in Casks or Barrels.

RULE. — Take all the dimensions in inches. Add the head and bung diameters and divide by 2 for the approximate mean diameter. Square the mean diameter and multiply by the depth. Multiply the result by .0034 for wine gallons, and .0028 for beer gallons.

How many wine gallons are contained in a cask, the bung diameter of which is 22 incues, the head diameter 24 inches, and the depth 30 inches?

PROCESS.— $22 + 24 = 46$. $46 \div 2 = 23$ (mean diameter). $23^2 = 529 \times 30$ (length) $= 15870$. $15870 \times .0034 = 53.9 +$ gallons.

Measurement of Grain.

RULE.—Find the cubic feet, and for U. S. standard bushels multiply by .80356; imperial (English) bushels multiply by .779. Or the following

RULE.—Find the cylindrical feet, and for U. S. standard bushels multiply by .63111; imperial (English) bushels by .61183.

EXAMPLES.—A granary 10 feet long, 5 feet wide, and 8 feet high is filled with wheat. Required, the number of U. S. standard bushels.

.80356 = capacity of one cubic foot.
400 = cubic feet.

321.4 + = bushels. *Ans.*

Carpenters' Rule to Make Square Timber Octagon or Eight-Sided.

Place a 24-inch rule across each side of the timber, with the ends of the rule at the edges of the stick, and then point off 7 inches from each end of the rule. Cut down to the points.

If a 12-inch rule be used, point off 3½ inches from each end.

INTEREST LAWS OF ALL THE STATES.

States and Territories.	Penalty of Usury.	Legal.	Special.
Alabama	Loss of interest	8	
Arizona	No penalty	10	No limit.
Arkansas	Forfeiture of prin. and interest	6	10 per ct.
California	No penalty	10	No limit.

* Act of Feb. 21, 1879.

† Also punishable as a misdemeanor.

‡ Also 6 per ct. on judgments.

TABLES OF WEIGHTS AND MEASURES.

Cubic Measure.

1,728 cubic inches 1 cubic foot, 27 cubic feet 1 cubic yard, 128 cubic feet 1 cord (wood), 40 cubic feet 1 ton (shipping), 2,150.42 cubic inches 1 standard bushel, 268.8 cubic inches 1 standard gallon, 1 cubic foot four-fifths of a bushel.

Surveyor's Measure.

7.92 inches 1 link, 25 links 1 rod, 4 rods 1 chain, 10 square chains or 160 square rods 1 acre, 640 acres 1 square mile.

Long Measure — Distance.

3 barleycorns 1 inch, 12 inches 1 foot, 3 feet 1 yard, 5½ yards 1 rod, 40 rods 1 furlong, 8 furlongs 1 mile.

Dry Measure.

2 pints make 1 quart, 8 quarts make 1 peck, 4 pecks make 1 bushel, 36 bushels make 1 chaldron.

Liquid or Wine Measure.

4 gills make 1 pint, 2 pints make 1 quart, 4 quarts make 1 gallon, 31½ gallons make 1 barrel, 2 barrels make 1 hogshead.

Apothecaries' Weight.

20 grains make 1 scruple, 3 scruples make 1 drachm, 8 drachms, make 1 ounce, 12 ounces make 1 pound.

Troy Weight.

24 grains make 1 pennyweight, 20 pennyweight make 1 ounce. By this weight, gold, silver and jewels only are weighed. The ounce and pound in this are same as in Apothecaries' weight.

Avoirdupois Weight.

6 drachms make 1 ounce, 16 ounces makes 1 pound, 25 pounds make 1 quarter, 4 quarters make 100 weight, 2,000 pounds make 1 ton.

Circular Measure

60 seconds make 1 minute, 60 minutes make 1 degree, 30 degrees make 1 sign, 90 degrees make 1 quadrant, 4 quadrants or 360 degrees make 1 circle.

Time Measure.

60 seconds make 1 minute, 60 minutes make 1 hour, 24 hours make 1 day, 7 days make 1 week, 4 weeks make 1 lunar month, 28, 29, 30, or 31 days make 1 calendar month (30 days make 1 month in computing interest), 52 weeks and 1 day, or 12 calendar months make 1 year, 365 days, 5 hours, 48 minutes, and 49 seconds make 1 solar year.

Square Measure.

144 square inches 1 square foot, square feet 1 square yard, 30¼ square yards 1 square rod, 40 square rods 1 rood, 4 roods 1 acre.

Cloth Measure.

2¼ inches 1 nail, 4 nails 1 quarter, 4 quarters 1 yard.

Miscellaneous.

3 inches 1 palm, 4 inches 1 hand, 6 inches 1 span, 18 inches 1 cubit, 21.8 inches 1 Bible cubit, 2½ feet 1 military pace.

Weight per Bushel of Grain, etc.

The following Official Table shows the number of pounds per bushel required, by law or custom, in the sale of articles specified in the several States of the Union.

States.	Barley.	Buckwheat.	Coal.	Corn, sh'l'd.	Corn Meal.	Onions.	Oats.	Potatoes.	Rye.	Wheat.	Salt.	Turnips.	Beans, wh.	Clover Seed.	Timothy.

USEFUL RECEIPTS FOR EVERYBODY.

TO CLEAN AND POLISH OLD FURNITURE.—Make a mixture of a quart of old beer or vinegar, with a handful of common salt, and a tablespoonful of muriatic acid, and boil it for fifteen minutes; put it in a bottle and warm it when wanted for use. Wash the furniture you wish to clean with soft hot water, so as to remove all the dirt, then afterward wash it with the mixture in the bottle; then polish with a soft flannel rag.

TREASURY DEPARTMENT WHITEWASH.—This receipt for whitewashing is sent out by the Light-house Board of the Treasury Department, and will answer on wood, brick, or stone nearly as well as oil paint, and is much cheaper:

Slack one-half bushel of unslacked lime with *boiling* water, keeping it covered during the process; strain it and add a peck of salt dissolved in warm water; three pounds ground rice, put in boiling water and boil to a thin paste; one-half pound powdered Spanish whiting and a pound of clear glue dissolved in hot water; mix these well together and let the mixture stand for several days. Keep the wash thus prepared in a kettle or portable furnace, and when used put it on as hot as possible with painter's or whitewash brushes.

TO PAPER WHITEWASHED WALLS.—Make a flour starch as you would for starching calico clothes, and with a whitewash brush wet with the starch the wall you wish to paper. Let it dry, then, when it is wanted to apply the paper wet both the

wall and paper with the starch and apply the paper in the ordinary way.

To Clean Wall-Paper.—The following is a most excellent and simple method of cleaning wall-paper and can be used with confidence in every house: Take one quart of flour and stir in 5 cents' worth of ammonia and enough water to make a stiff dough; work and knead until smooth, then wipe the paper with this batch of dough, working it so that a clean surface will be presented with every stroke. Go over the paper in this way and your wall-paper will be clean.

A Wash for Carpets.—Mix together 30 cents' worth of ground soap-tree bark (which can be purchased at any drug store), 5 cents' worth of ammonia, one cup of vinegar, one and a half pails of water. Boil this mixture one hour in a boiler, and use it on the carpet with a sponge.

To Make Kalsomine.—Kalsomine is a mixture of zinc white with water and glue sizing. Kalsomine for ceilings is made by mixing one-half pound of glue with fifteen pounds of zinc white; for walls, one pound of glue and fifteen pounds of zinc white. The glue, a night before it is to be used, should be soaked in water, and in the morning liquefied on the fire. The surface to be kalsomined must be clean and smooth. Zinc white is rather expensive, and Paris white (which is sulphate of baryta, and can be purchased at any drug store) may be substituted. Suppose you wish to kalsomine a wall sixteen by twenty feet with two coats of kalsomine, proceed as follows: Take one-quarter pound of light-colored glue and five or six pounds of Paris white; soak the glue over

night with about one quart of warm water; the next morning—that is, if you wish to kalsomine—add a pint of clean water to the glue (which must be put in a tin vessel), and place the tin vessel containing the glue in a kettle of boiling water over the fire, stirring the glue constantly until it is well dissolved and quite thin; by this means scorching the glue will be prevented.

Place the Paris white in a large water pail, pour on hot water and stir it until the liquid appears like thick milk. Now mix the glue liquid with the whiting, stirring it thoroughly until the mixture is complete, and it is then ready to be applied.

A good whitewash brush or a large paint brush will answer the purpose of painting the walls, with the kalsomine, although more expensive brushes, made purposely for kalsomining are sold in paint and hardware stores; whatever you use, spread the liquid on smoothly and evenly, dipping the brush frequently, and take only enough kalsomine as will be retained by the brush without dripping off. Should the kalsomine become thick, it can be thinned by adding hot water. Endeavor to apply thin coats, for a thin coat will not crack.

A Remedy for Burns.—A celebrated German remedy for burns consists of fifteen ounces of the best white glue, broken in small pieces, into two pints of water, and allowed to become soft. Then dissolved, by means of a water-bath (an extemporaneous water-bath can be made by putting a tin pail into a kettle of boiling water), and two ounces of glycerine and six drachms of carbonic acid added, the heat

being continued until all is thoroughly dissolved. On cooling, this hardens to an elastic mass, covered with a shining, parchment-like skin, and may be kept for any length of time.

When required for use it is placed for a few minutes in a water-bath until sufficiently liquid, and applied to the burnt surface by means of a broad brush. It forms in about two minutes a shining, smooth, flexible and nearly transparent skin, and will cause almost instantaneous relief to the sufferer. This is a good remedy, and is simple, cheap, and expeditious.

A Home-made Remedy for Sprains, Wrenches, and Rheumatism. — The following remedy is alone worth the price of this book. It is a simple ointment for man and beast which has been used in the family of the writer for years, *and has never failed to effect either a cure or almost a cure!* Buy at your drug store one ounce of spirits of turpentine and one ounce of origanum. Take two fresh eggs and break them in one-half pint of cider vinegar, beating the eggs and vinegar well together; now add the turpentine and origanum, and put the entire mixture in a bottle, shaking it thoroughly, so as to more completely mix the remedy. Cork it tightly until needed. In applying it to a sprain, either for a person or animal, work it into the skin over the affected part by rubbing with the fingers and a flannel rag. For rheumatism this remedy is invaluable, and worth all the patent medicines made. Use it as if for a sprain, and relief will follow at once. Rub it well in, and apply some to a flannel rag, which must be wrapped around the place like a bandage.

A HANDY CEMENT to have about the house is made as follows: Melt together, in a common iron kettle or pan, 2 parts of common pitch and 1 part of gutta-percha, stirring the mixture continually until thoroughly mixed, then pour the liquid into cold water. When it is cold it will form a black, solid, elastic mass, which soften with heat. It will become liquid at about 100 degrees Fahr., and can then be used either in its liquid state or a soft paste for cementing broken metal, glass, or crockery. It can also be used for glazing windows.

TO DISTINGUISH WROUGHT IRON, CAST IRON AND STEEL.—Make a bright surface on the metal by filing and polishing a small portion, and then apply a single drop of *nitric acid*. Allow the acid to remain a minute or two, and then wash it off with water. If the spot has a pale ashy appearance the metal is wrought iron; if a brownish black, it is steel, and if a deep black, it is cast iron.

TO PRESERVE TIMBER FROM DRY ROT AND DECAY.—The best way to do this is to force into the pores of well seasoned lumber as much carbolic acid or creosote as the wood will take. For barns and outbuildings this can be done by using a brush, applying the liquid until the lumber can *soak* in no more.

TO PREVENT SPLITTING OF LOGS AND PLANKS.—Logs and planks split at the ends because the ends dry faster than the inside. To prevent this, saturate some muriatic acid with lime until it looks like whitewash, and paint the ends of the logs, poles or timbers with the compound. It will prevent the wood from splitting and afterward from rotting.

GLUE PAINT FOR KITCHEN FLOORS.—To three pounds of spruce yellow add one pound, or two pounds if desired, of dry white lead, and mix well together. Dissolve two ounces of glue in one quart of water, stirring often until smooth and nearly boiling. Thicken the glue water after the manner of mush, until it will spread smoothly upon the floor. Use a common paint brush and apply hot. This will fill all crevices of a rough floor. It will dry soon, and when dry apply boiled linseed oil with a clean brush. In a few hours it will be found dry enough to use by laying papers or mats to step on for a few days. When it needs cleaning, use hot suds.

TO PERFORATE GLASS.—In drilling glass, stick a piece of stiff clay or putty on the part where you wish to make the hole. Make a hole in the putty the size you want the hole, reaching to the glass, of course. Into this hole pour a little moulten lead, when, unless it is very thick glass, the piece will immediately drop out.

CEMENT TO MEND IRON POTS AND PANS.—Take two parts of sulphur and one part, by weight, of fine black lead; put the sulphur in an old iron pan, holding it over the fire until it begins to melt, then add the lead; stir it well until all is mixed and melted; then pour it out on an iron plate or smooth stone. When cool break into small pieces. A sufficient quantity of this compound being placed upon the crack of the iron pot to be mended, can be soldered by a hot iron in the same way a tinsmith solders his sheets. If there is a small hole in the pot, drive a copper rivet in it, and then solder over with cement.

LIVE AGENTS

Wise in their work. make *more* money and are more *sure* of quick returns, on the *least* expenditure of time and money, than any other trade, business or profession.

We offer opportunities for *permanent employment* and *reliable* money making that are unexcelled. No experience or training is necessary. Our books are made for *special needs*, and they sell at sight.

Even boys and girls are making good salaries selling these books, as they are needed by all classes in every community, and their merit can be understood at a glance.

Salva-Webster Spanish-English and English-Spanish Dictionary.

40,000 words and definitions; also maps of South America and Mexico, U. S. Consulates in those countries, and Spanish Consulates in the U. S. Statistical information on all countries where Spanish is spoken; biographical dictionary of famous men of those countries; their moneys, weights and measures; conversation practices, irregular verbs, etc., etc. Flexible cloth, not indexed, 30c. Stiff silk cloth, double index, 60c.

The Grimm-Webster German-English and English-German Dictionary.

Accurate, complete, up to date. 30,000 words defined in both languages. Conversation, Letter Writing, Irregular Verbs, Tables of Weights and Measures, etc., etc. Artistic cover design, showing German and American National Emblems, Portraits of Grimm brothers (German) and Noah Webster (American), and many other appropriate illustrations. Limp cloth, red edges, not indexed, 25c. Stiff silk cloth, red edges, complete double index, 50c.

The Modern Webster Dictionary.

Illustrated. 432 pages, 60,000 words and definitions. A great favorite in public schools. Foreign Phrases, Abbreviations, Proof Reading, etc. Limp cloth, red edges, 25c. Stiff silk cloth, red edges, indexed, 50c.

The Engineers' and Machinists' Pocket Book.

An Exhaustive Treatise on Gear, Valve and Indicator Practice. No useless technical difficulties. Vocabulary of 2,000 mechanical and electrical words. How to Connect Dynamos and Motors; Shafting, Drills, Wire Weights and Resistances, Screw Cutting, Properties of Saturated Steam, Fractions, etc., etc. Illustrated with mechanical sketches and diagrams. Leather, stained edges, gold stamped title, pocket, flap and band, $1.00.

The Mechanical Arts Simplified.

497 pages. Arranged and edited by D. B. Dixon. New, improved edition. A large 12mo. Illustrated. A Thorough and Original Book of Reference for Architects, Iron Workers, Boiler Makers, Contractors, Civil and Mechanical Engineers, Firemen, etc., etc. Silk cloth, marbled edges, $2.50. Actual size, 8¾x5½ inches.

Stephenson's Practical Test and Reference Book

For Engineers, Mechanics, Machinists, Firemen, etc. Boilers and Engines and how to make them; Engineers' License Examination Questions and Answers. Stiff silk cloth, red edges, $1.00.

The Mechanic's Complete Library.

576 pages. Illustrated. Five Books in One. Mechanics in a nutshell. Statistics of all kinds. Rules, Processes, Tables, Curious Facts, Data of Untold Value. Greatest buildings described. Glossary of technical terms. How to make batteries, etc., etc. Stiff silk cloth, red edges, $1.00. Morocco, marbled edges, $1.50.

Zwicker's Revised Instructor.

For Artisans, Fire, Marine and Locomotive Engineers. The work of a Practical Machinist, in the form of questions and answers. Flexible cloth, red edges, 75c.

Practical Application of Dynamo Electric Machinery.

By McFadden and Ray. Every Motorman, Lineman, Dynamo Tender and Engineer should own a copy. By far the best and cheapest book of its kind. Flexible cloth, red edges, $1.00.

LAIRD & LEE, Publishers,
263 Wabash Ave., CHICAGO.

...lin's Handy Manual of Useful Information and Atlas of the World.

532 pages. Fifty full-page colored maps. New, revised edition each year. Dingley Tariff complete, compared with McKinley and Wilson bills. 1,800,000 sold! Limp cloth, red edges, 25c. Stiff silk cloth, red edges, 50c.

Lee's Priceless Recipes.

368 pages. Illustrated. Recipes for everything except cooking. 3,000 secrets for the home, farm, laboratory, workshop, and every department of human endeavor. Limp cloth, red edges, 25c. Stiff silk cloth, red edges, 50c.

Edison's Encyclopedia and World's Atlas.

512 pages. Fifty colored maps. 2,000 subjects of highest value to all, carefully classified. "Worth its weight in gold." Every country in the world fully described. A little treasure of universal knowledge. Limp cloth, red edges, 25c. Library style, 50c.

The Little Gem.

448 pages. A complete and accurate epitome of valuable knowledge. The classification of matter is unexcelled. Thousands of items of entrancing interest. Limp cloth, red edges, 25c. Library style, 50c.

Lee's Vest-Pocket Pointers for Busy People.

230 pages. Contents alphabetically arranged. Might easily be called an Encyclopedic Dictionary, covering the ground it does. 20,000 items of value. United States Constitution in full. Area, population, rulers, etc., of all nations. Parliamentary Rulers, etc., etc. Limp cloth, red edges, 25c. Morocco, full gilt, 50c.

Lee's Home and Business Instructor.

372 pages. Illustrated. New, original, reliable. Ten departments, written by ten specialists. Penmanship, Letter-Writing, Banking, Every-Day Law, Social Forms, Public Speaking, Mercantile aud Technical Terms, etc., etc. Limp cloth, red edges, 25c. Stiff silk cloth, red edges, 50c. Full morocco, full gilt, $1.00.
